

# PYTHON PROGRAMMING COURSE

## WEEK 3 – Object-Oriented Programming (OOPs) + Libraries

### Focus:

Classes, Objects, Inheritance, and Python Libraries.

### Topics Covered:

- Classes, Objects, Constructors
- Inheritance, Polymorphism
- Exception Handling
- `math`, `random`, and `datetime` modules

## Assignments:

### 1. Bank Account Class

- Create class with methods: deposit, withdraw, display balance.

### 2. Library Management System (OOP)

- Add/remove books, issue/return books.

### 3. Calculator Class with Exception Handling

## Mini Project (W3):

### “Billing System (OOP-based)”

- Product class → attributes: name, price, quantity
- Bill class → total calculation + tax
- Display final bill in tabular format

 *Skill Gain:* Real-world class design, object interaction.
